WSTIMS FOR WINDOWS USERS NEWSLETTER

This newsletter is for you, the user, to inform you of problems that have been sent in from scorers across the nation and the solutions for those problems. We will be sending this out from time to time to keep you informed and assist you in usage of the program. If you have a problem or issue that needs to be addressed send an email to the editor and we will get your problem addressed immediately and keep all of the users informed of the problems/solutions involved.

Version 1.0.1.31 Will Be Available Tuesday Morning

A new update 1.0.1.31 will be available on Tuesday morning. The Chief Scorers for the Regional tournaments next weekend need to use this version of the program. Unless the wheels fall off the wagon, this will be the final update of the program until after the Nationals.

The update will address the following issues:
1. The final adjustment to the Jump Timing tolerances and rationale according to the new policies that was attached to Issue 04 has been completed. This includes the handling of the Open Women (OW), Open Men (OM), International Women (IW) and International Men (IM) specifications.

2. When entering a fall and the time data on the final Jump, make sure that you see the Round Complete notation in the window just above the scoring panel before proceeding to your next Jumper.

3. ALWAYS make sure that your active round is correct when you change skiers/age divisions. This is especially true in Turn and Burn type tournament formats.

4. In a tournament such as the State Championships, Regionals and Nationals where there may be ties to be broken and you use the RO (Run Off) option to score the tie breaking runs, make sure that when you have finished and proceed to your next age division that you select the correct round to score the next event in. If some skier scores are missing from your scorebook, stop and think for a minute, if a tie breaker situation was scored in the previous age division. If so look and see if your missing scores might be in the RO section of the current age division that is being scored.. If this happens you will need to delete them and re-enter the scores in the proper round.

5. Placements have been added to the results grids in the Championship format scorebook.

6. If a skier sets a record, the alert panel that comes up will have the approved current records as of 7/22/2011. The records are verified by age division for each event.

Debbie Kern has designed a Power Point presentation for the WSTIMS for Windows scoring program (attached). The presentation will take you from the basic setup for a tournament all the way through the scoring of each event. This will give you a good, basic foundation to work from and operate the program the way it has been designed to operate by Dave Allen. For more advanced procedures you can refer to the USERS Manual version 1.4.

Have fun at the Regionals and we'll see you at the Nationals
