Programmer: Dave Allen

This newsletter is for you, the user, to inform you of problems that have been sent in from scorers across the nation and the solutions for those problems. We will be sending this out from time to time to keep you informed and assist you in usage of the program. If you have a problem or issue that needs to be addressed send an email to the editor and we will get your problem addressed immediately and keep all of the users informed of the problems/solutions involved.

Update 1.0.1.76 is Available for Downloading

The updated version 1.0.1.76 is now available for download and has fixed several glitches in the Officials Work Record section and an incorrect interpretation of a fast Jump time in the 82m segment.

Officials Work Record Updates

The records on the Master computer were getting updated by imports from the Satellite computer when the Master contains a more up to date file entry. The Officials Work Record entries were not properly updating using the “Last Update Date/Time” stamp whichever computer wrote the newer information. This has been fixed and the file will now contain the most up to date information from the Satellite computers and the Master computer after the importing of the event scoring files to the Master computer file.

Time of Performance Bubble Added to Event Scoring Screens

For those of us that score class ELR tournaments, the Technical Controller is always bugging us for the time stamp on the performance, so that they can go back to their video/DVR recorders to locate the performance/passes time. Dave has added a “Bubble” that will appear that will show the “Last Update Date/Time” stamp for the skier.

Slalom and Jump Time/Date “Bubble”

In the event scoring panel hover over the mouse pointer over the “RD” (round) cell (first cell on scoring line) and you will see the date/time that the pass was scored.

Trick Time/Date “Bubble”

The Bubble is located in the “Score” cell (4th cell to the right) in the left hand panel (not in trick pass scoring panel) which contains the list of your skiers in the various scoring categories that you are using for your tournament.

Incorrect Rule Interpretation in 82m Segment Fast Time

When a skier had a fast 82m segment and a good 41m segment time, the results indicated a fast first segment with a mandatory reride, if the jump was the longest in the set, but was showing that the score was protected. This was incorrect and has been corrected to show that the reride jump does not have a protected score per the rules.

AWSA Records List Updated

The AWSA Records contained in this program version have been updated and are the current event records that have been approved by the Technical committee and the President of AWSA.

Version 1.0.1.77 Update

Version 1.0.1.27 will be out in the next few days that will have the 2014 NOPS data tables for your 2014 sanctioned tournaments. The data tables will be effective when you enter the sanction number in the Tournament Setup screen.

Big Dawg Head to Head Scoring

Mark Harvat and I will be scoring the Big Dawg Finals on Thursday and Friday during the Nationals and if you would like to drop by and talk about the Head to Head scoring format in WSTIMS for Windows, we welcome you to drop by and visit.

We look forward to seeing you in West Palm Beach.
