

## WSTIMS For Windows Fix List

Status	Priority	Program Version	Component	Issue	Notes
Closed	H	5.0.0.2	Slalom Entry	When a speed above maximum is selected for a skier in an L or R class score this as if it was at the division max and not using ZBS.	Fixed this issue so in E/L/R events a skier can ski above maximum but will only be skied at the division max
Closed	H	5.0.0.2	NCWSA Scorebook	<p>I think the only change we have on scoring is in ncwsa.</p> <p>We would like the zero scores to act as a tie in the sense that they would split the points evenly, let me know if this is possible</p> <p>So in this example those guys that got zero for 22T would now get <math>(50+40+30+20+10)/5=30</math></p>	Changed scoring to allow placement points to be awarded to skiers with a zero score
