

WSTIMS For Windows Fix List

Status	Priority	Program Version	Component	Issue	Notes
Closed	M	5.0.0.7	Trick Entry	Possible flip codes not properly mark as a flip	<p>The FFLBB and BFLSLBB were not properly marked as flips and were not included in the flip count. This has been corrected.</p> <p>Also, added validation for L/R skiers with more than 6 flips. Lowest valued flips marked as repeats</p>
Closed	H	5.0.0.7	Backup	Would like a way to create a database backup file	Added new option to tools menu to backup the current database file.
Closed	H	5.0.0.7	Registration Import	Index out of range exception is being encountered when importing all active records.	Not all records were getting created with the expected number of columns. Many members without official ratings did not have the full set of columns. Added functionality to check the input row length before updating official entries for a member.
Closed	H	5.0.0.7	Slalom Entry	Dialog showing when moving from 1 skier to another. The dialog is indicating that there is a problem with the member number on the selected record	Corrected a problem that was occurring when a skier without a score was selected and then a different round was selected. Internally there was information that was out of sync when this happened causing the dialog to be shown. No data was being lost.
