

WSTIMS For Windows Fix List

Status	Priority	Program Version	Component	Issue	Notes
Closed	L	5.0.1.0	Slalom Entry	18S134 Bud Davis. Had several skiers where the speed appears to increase along with decreasing the rope length but there is no indication of using Opt Up. I have tried for several hours but I'm unable to duplicate. Can't figure out anyway this can happen but I see it in the log and I saw it happen (just once) at Wolfboro	This situation was occurring when a skier completed a pass and the option for selecting either to either increase speed or shorten the line is displayed. If the scorer selected to shorten the line but then realized that the skier wanted to increase the speed. The scorer would delete the pass and then selected speed when the dialog was shown again. This scenario was not being handled correctly and both the speed was increased and the line was shortened.
Closed	M	5.0.1.0	Slalom Entry	When skier is at div max and runs a pass the line length shortens automatically, which is ok. If the skier wants to go above max speed instead use the opt up button which will reset the rope length and increase the speed but the line length status color is not updated.	Fixed line length display to reset to previous pass line length when the speed has been increased using Opt Up.
